

Pioneer

Dr. Torako Yui has been responsible for the introduction and spread of homeopathy throughout Japan. She is the founder and principal of Royal Academy of Homeopathy, Japan, also the President of the Japanese Homeopathic Medical Association (JPHMA). Besides being an active homeopathic practitioner, Dr. Yui is also a lecturer and a celebrated author.

Homeopathy has a long history that even the British Royal family accepted it for therapy and it is also known as the alternative remedy for some diseases. During her stay in England, homeopathic treatment of ulcerative colitis gave a big impression to her that made her to study homeopathy.

She passed the board exam, got the Homeopathic certification from the British homeopathy association and started to do homeopathy treatment.

Dr. Torako Yui

She has done her PhD at Swiss ICU homeopathy and as chairman of Japan homeopathy association (JPHMA), she is also a honorary member of British Homeopathic Association (HMA). It is the research for vaccination, and iatrogenic disease which made her a focus of attention worldwide. As a homeopathist and a head of the school (RAH), she was trying to promulgate the basic fundamental for the future development of homeopathy in Japan.

She has authored "A Bottle of Remedies from London", "Homeopathy Cures Body and Mind", "Torako Yui's Homeopathic Guidebooks". She had presented papers in international conferences and is recipient of many awards.

Dr. Jessy Markose BHMS

www.digibio.com

Dr. Jacques Benveniste's observations have come to be known as the memory of water which supported the system on the law of infinitesimals can be inspired from this site. It gives various informations on research and development and its contribution to the world. Articles on molecular signaling and other interesting features are available to keep updated. Every homoeopath needs to understand the science which is needed today and dedicate themselves as scientist and contribute to homoeopathic fraternity.

Dr. M.S. Bhagavathi BHMS
